PROFILE

Fullstack Developer with experience in web application development using modern JavaScript technologies such as Vue.js, React, and Svelte, as well as Node.js-based backend development. Experienced in building modular, scalable, and maintainable applications, ranging from frontend development, REST API integration, to database management. Also has additional experience in mobile development using Flutter and React Native for Android and cross-platform applications. Strong interest in clean architecture, best practices, and exploring new technologies to improve product quality and development efficiency. Able to work independently or collaboratively in a team environment, communicate effectively, and adapt quickly to dynamic project requirements.
